Smart helpers to make your everyday life easier

In the new Crafter, some of our most intelligent driver assistance systems work hard to give you all-round support. In city traffic, the Blind Spot Information System with Moving Off Information System warns you of pedestrians and cyclists in the blind spot on the passenger side – or in front of your new Crafter when you start driving again after stopping. In addition, many more smart helpers are now standard in the new Crafter – from Lane Assist to Sign Assist to the electronic parking brake including Auto Hold function, which allows you to release the parking brake without the car rolling away.
